How many service stations does Senegal have?

Senegal has 1 169 service stations. Senegal has import quotas for LPG in place. The distribution of LPG to the rural population entails high costs and bottlenecks remain in the logistics to move products from Dakar to the isolated areas of the country.

Does Senegal need a transmission line?

The connection to the transmission line of the OMVS is also relevant for Senegal and its neighbouring countries. Senegal is part of the WAPP, which aims to promote and develop power generation and transmission infrastructures and co-ordinate power exchange among ECOWAS member states.

Does Senegal have electricity access?

Senegal has put electricity access at the core of its policy strategy. In 2014, the government adopted the Plan for an Emerging Senegal (PSE), with the aim of achieving structural transformation of the domestic economy and reaching middle-income status by 2035.

Which solar companies operate in Senegal?

3.2%. Attracted by the stable political environment, several notable local and international solar PV companies like Oolu Solar and Baobab+ operate in Senegal, using cash sales, pay-as-you-go (PAYGo), and partnerships with micro-finance institutions

Energy Management Systems (EMS) play an increasingly vital role in modern power systems, especially as energy storage solutions and distributed resources continue to expand.
