-----

Many utilities have embraced gas, or promoted restarting closed coal or nuclear plants, but that overlooks the cheapest and fastest ...

Solar + storage lets you power your upgraded home with renewable energy from the sun and gives you greater resilience too. Make the most of your upgrades when you start by preparing ...

From rust to sand to gravity, new techniques are making it happen. Solar and wind energy systems require some means of saving power for times when the sun doesn't shine ...

Comprehensive guide to renewable energy storage technologies, costs, benefits, and applications. Compare battery, mechanical, and thermal storage systems for 2025.

New York has formalized its clean energy goals in a new draft State Energy Plan, setting a course to deploy 9.4 GW of battery energy storage systems (BESS) by 2040.

Many utilities have embraced gas, or promoted restarting closed coal or nuclear plants, but that overlooks the cheapest and fastest-to-build option - solar energy combined ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

4. Energy based on moving electrons will get cheaper and cheaper compared to energy based on moving atoms. When combined with cheap solar, rapid battery pack cost ...

New York has formalized its clean energy goals in a new draft State Energy Plan, setting a course to deploy 9.4 GW of battery energy ...

Through the Clean Energy Program, DCAS works to expand distributed energy resources, including solar PV and energy storage installations across the City's portfolio of properties.

Across the United States, battery energy storage is rapidly emerging from a niche technology into mainstream grid infrastructure. The growing attractiveness of battery energy ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...
