What are solar aircon systems?

Beat the heat without breaking the bank with our advanced range of solar aircon systems. Specially designed for South African conditions, these units harness the power of the sun to deliver powerful, efficient cooling and heating for homes, offices, and off-grid spaces.

Are solar aircon systems right for You?

Whether you're looking to reduce electricity bills, avoid loadshedding disruptions, or transition to a more eco-friendly lifestyle, a solar aircon is the perfect solution. These systems operate using solar panels, reducing dependency on the grid and offering significant long-term savings.

How much power does a solar air conditioner use?

Limit AC Grid Power from 0-600W with an AC Power limit. Performs Across a Wide Temperature Range (-10° to 58°). The Deye Solar Air Conditioner is an 18,000 BTU air conditioner that can be powered by solar panels. This means that you can save money on your electricity bills and reduce your reliance on the grid.

How do solar aircon systems work?

These systems operate using solar panels, reducing dependency on the grid and offering significant long-term savings. At Xsolar, we offer a carefully curated selection of hybrid and fully off-grid solar aircon units, combining high-performance technology with sleek, modern designs.

Latest 2025 DC48V solar hybrid air conditioners (9000-48000 BTU) from Volta, Alliance, Midea & Jet-Air. Run 100% on 4-12 solar panels during daylight with zero batteries.
