Green, renewable energy is the future. Find out what makes the Netherlands a pioneer in wind and solar energy and how you can experience that for yourself.

The floating solar system isn't just a pretty face with a poetic name. It was assembled in just three days at the Port of Amsterdam using prefabricated units, proving that ...

By 2050, the Netherlands wants to be using energy from sustainable sources only. There's a long way to go before this can happen. It will require new wind farms, electricity pylons, cables and ...

As previously noted, the Dutch government's climate-related expenditures are not exclusively directed towards wind and solar energy ...

Green, renewable energy is the future. Find out what makes the Netherlands a pioneer in wind and solar energy and how you ...

The floating solar system isn't just a pretty face with a poetic name. It was assembled in just three days at the Port of Amsterdam using ...

The system, supplied and built by Oceans of Energy, is larger than a football field and is set to integrate power supply at the Hollandse Kust Noord offshore wind farm in ...

This research highlights how we currently utilize Amsterdam's roofs and how we can use them to improve useful energy generation to move toward climate neutrality.

Where do we place solar farms and wind turbines? A new study shows the deciding factors, predicting where we will generate solar and wind power in the future.

By 2050, the Netherlands wants to be using energy from sustainable sources only. There's a long way to go before this can happen. It will require new ...
