-----

After last year's severe overcapacity slump, Chinese battery firms secured about 200 overseas orders totaling 186 GWh in H1 2025.

Luckily, these efforts appear to be paying off: China Energy Storage Alliance has reported that Chinese battery storage firms secured ~200 overseas orders totalling 186 ...

China's dominance in energy storage is set to reach new heights, with global shipments of lithium-ion battery cells for energy storage expected to surge by 75% this year, ...

Demand for renewables and data centres has caused a surge in shipments of lithium-ion storage batteries, with Chinese firms exporting more than \$66 billion this year

Chinese battery storage firms secured approximately 200 overseas orders totalling 186 gigawatt-hours in the first half of 2025 alone, representing a remarkable 220% year-over ...

Discover how China's battery giants are conquering global markets with a 220% export surge, amid overcapacity and U.S. tariffs. Explore the booming energy storage ...

Roughly half of that came from China, highlighting the extent to which battery and component shipments to key US industries are caught in the crossfire of escalating trade ...

China's battery producers are increasingly dominating global energy storage markets, with exports surging more than 220% year over year in the first half of 2025.

Chinese exports of renewable products surged by 35% from 2019 to 2023, driven by competitive pricing and dominant production capacity, according to Wood Mackenzie's new ...

Industry data reveals that exports of photovoltaic (PV) modules and lithium-based energy storage systems surged in Q1 2025, especially toward regions emphasizing energy ...
