Where is Kazakhstan's new solar power plant located?

A few months later, the EBRD loaned another \$42.5 million toward a \$75 million 63 MW solar photovoltaic power plant that Risen is building in Chulakkurgan, north of Shymkent. China, which now produces 70 percent of the world's solar panels, is well represented in Kazakhstan's new renewable projects, but it is not the only player.

How many solar power plants are there in Kazakhstan?

Solar Power: The potential of solar energy in Kazakhstan is estimated at 2.5 billion kWh per year. Solar energy can be widely used in two-thirds of Kazakhstan's territory. The government aimed to put 28 solar power plants into operation by the end of 2021, and met this goal, with currently 51 solar power plants in operation.

What is Kazakhstan's largest solar project?

Kazakhstan's largest solar project - a 100 MW field in Saran, Karaganda Province - was opened last year by a German company, also with EBRD backing. Russian engineers doubled capacity at the EBRD-backed Burnoye plant in Zhambyl in 2018.

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

Listed below are the five largest upcoming Solar PV power plants by capacity in Kazakhstan, according to GlobalData's power plants database. GlobalData uses proprietary ...

On June 19, 2025, an auction was held to select renewable energy projects for the construction of a solar power plant (SPP) in the Southern Zone of ...

One of the most notable solar power plant projects in Kazakhstan is the Burnoye Solar Power Plant, located in the Zhambyl region. With a capacity of 100 MW, it is one of the ...

The two sides plan to build a solar power station with an installed capacity of 300 megawatts in Sauran District, Turkestan region of Kazakhstan, with a total investment of 320 ...

On June 19, 2025, an auction was held to select renewable energy projects for the construction of a solar power plant (SPP) in the Southern Zone of Kazakhstan's Unified Power System (UPS), ...

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target.

As a seasoned member of Universal Energy Kazakhstan, Turganbekov has witnessed firsthand the remarkable transformation brought about by solar power stations, ...

On 10 February 2025, Kazakhstan's Ministry of Energy officially approved its 2025 auction schedule for renewable energy projects.

First MW scale photovoltaic power plants have been launched into commercial operation, whilst a pipeline of over 2,000 MW (2 GW) solar projects is progressing in different permitting process ...

The Altyn Dala Solar Power Station is expected to have significant environmental and economic impacts. By expanding the country's solar energy capacity, the project will help ...

One of the most notable solar power plant projects in Kazakhstan is the Burnoye Solar Power Plant, located in the Zhambyl ...

For investors looking to participate in the global clean energy revolution, Kazakhstan offers unique opportunities in solar, wind, and hydroelectric power. Kazakhstan ...
