Manila-based Asian Development Bank said it had approved a 200 million dollar loan to Sri Lanka to upgrade its power grid to accommodate more renewable energy and build ...

Based on an extensive evaluation of various energy storage technologies, four (4) key solutions have been identified as the most suitable options for Sri Lanka which can be implemented ...

With national goals to meet 70% of electricity demand through renewable energy by 2030 and achieve carbon neutrality in power generation by 2050, Sri Lanka has already made ...

The overall project aims to enhance the reliability and optimise the existing fault clearance system of transmission and ...

The LIVA Hybrid Energy Storage System (Hybrid ESS) for industrial applications helps to improve energy and power management to reduce energy costs and CO 2 emissions. Hybrid ESS can ...

The overall project aims to enhance the reliability and optimise the existing fault clearance system of transmission and distribution (T& D) networks of Sri Lanka's two grid ...

AMG Advanced Metallurgical Group has energized its first hybrid storage system based on lithium-ion batteries and vanadium redox flow batteries in Germany. The system reportedly ...

This report delves into the transformative phase of Sri Lanka's energy sector, highlighting the growing adoption of renewable energy sources like solar and wind power.

With national goals to meet 70% of electricity demand through renewable energy by 2030 and achieve carbon neutrality in power ...

AMG provides materials science-based technologies to improve energy efficiency and increase energy supply, such as graphite used as an insulation material or vanadium electrolyte for ...

Sri Lanka AMG lithium vanadium battery energy storage
