Stockholm Exergi will operate the BESS. ADS-TEC claimed the project is the most powerful modular large-scale storage solution in Sweden, though the announcement didn't specifically ...

Stockholm Norvik Port was completed in 2020 and has been designed to have the least possible environmental impact. All of the buildings are constructed according to the ...

Danish solar company Nordic Solar has launched construction works on its first battery energy storage system (BESS) project in Sweden, an 18-MWh site located in ...

Vattenfall operates large battery storage systems in combination with wind and solar parks at several locations in Europe. These combined systems, also known as hybrid parks, balance ...

Our latest overview of the top 20 battery energy storage projects in Sweden reveals a market that has shifted from cautious pilot activity to industrial-scale deployment in ...

It aims to tackle challenges like limited grid capacity and increased energy demands by integrating solar power, battery storage, and an advanced energy management system. ...

Ports of Stockholm, in collaboration with partners, launched an innovative project combining onshore power supply (OPS) with microgrid technology to enhance sustainability.

Just last month, Stockholm unveiled Northern Europe's largest lithium-ion storage array - 150 connected containers storing enough energy to power 45,000 homes during winter blackouts.

The demonstration project for the collaborative effort--connecting wind, solar and battery storage--is starting in the Port of Kapellskär, one of several cargo and passenger ports ...

Ports of Stockholm and its partners are now launching an innovative project that combines onshore power supply (OPS) and microgrid technology. The initiative will reduce ...
