What is the cost of solar electricity in Vietnam?

Last year, Vietnam had a solar LCOE (Levelized Cost of Energy) of \$0.046 per kWh for solar electricity. The cost in the United States was \$0.055 per unit of power, and in Turkey it was \$0.064.

How do solar tariffs work in Vietnam?

Under the revised tariff framework, solar installations are categorized into ground-mounted and floating types, and are further segmented by region--North, Central, and South Vietnam. Rates are adjusted based on factors such as solar resource availability, cost structure, and local grid demand. The inclusion of storage also affects pricing.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

What are the FIT rates for solar systems?

The tariff breakdown is as follows: Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates.

H&#192; NOI -- The Ministry of Industry and Trade (MoIT) has officially issued the 2025 electricity generation price ceiling framework for various types of ...

H&#192; NOI -- The Ministry of Industry and Trade (MoIT) has officially issued the 2025 electricity generation price ceiling framework for various types of power plants, including hydropower, ...

This framework, issued by the MOIT, ensures transparency and consistency in pricing, serving as the foundation for agreements between power generation units and ...

Decree 988/QĐ-BCT issued by the Ministry of Industry and Trade on April 16, 2025, established a new pricing framework for solar ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing ...

The Minister of Industry and Trade has just issued a decision approving the electricity generation price framework applicable to solar power plants in 2025.

When Vietnam Electricity Group (EVN) announced that FIT prices would sunset for projects after December 31, 2020, it sent ripples through neighborhoods, businesses, and ...

Vietnam's Ministry of Industry and Trade has proposed a subsidy of \$1.65 billion to support 14 million households in installing rooftop solar systems. Household rooftop solar ...

Decree 988/QD-BCT issued by the Ministry of Industry and Trade on April 16, 2025, established a new pricing framework for solar power generation in Vietnam. Changes in this ...

- The Electricity of Vietnam (EVN) has just issued a Notice to the Electricity Corporations, Electricity Telecommunications and Information Technology Companies about ...

Explore the solar energy costs in Vietnam for 2025 with pricing frameworks and policy trends enhancing efficiency.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, ...
