-----

Researchers from the University of Applied Sciences and Arts of Southern Switzerland (SUPSI) simulated a compressed air storage power station of this kind in a computer model and ...

Compressed air energy storage (CAES) is a promising solution for large-scale, long-duration energy storage with competitive economics. This paper provides a ...

For the first time, a pilot project called Alacaes is developing a new system that stores electricity in the form of compressed air in the Swiss Alps, with the support of the Swiss ...

To improve the energy efficiency and economic performance of the compressed air energy storage system, this study proposes a design for integrating a compressed air energy ...

Recent advancements have focussed on optimising thermodynamic performance and reducing energy losses during charge-discharge cycles, while innovative configurations have been ...

OverviewTypesCompressors and expandersStorageEnvironmental ImpactHistoryProjectsStorage thermodynamicsCompressed-air-energy storage (CAES) is a way to store energy for later use using compressed air. At a utility scale, energy generated during periods of low demand can be released during peak load periods. The first utility-scale CAES project was in the Huntorf power plant in Elsfleth, Germany, and is still operational as of 2024 . The Huntorf plant was initially de...

Green-Y, a Swiss start-up founded in 2020, has developed a compressed air power storage unit that can heat and cool, combining the functions of a battery and a heat ...

Storing high pressure air at over 500 °C is technically difficult for a number of reasons and not very efficient. Therefore the air is usually cooled down before storing it in underground ...

Researchers from the University of Applied Sciences and Arts of Southern Switzerland (SUPSI) simulated a compressed air storage power station of ...

# Swiss Compressed Air Energy Storage Power Generation

ALACAES is a privately held Swiss company that is developing an advanced adiabatic compressed air energy storage (AA-CAES) solution for large-scale electricity storage.

Contrasted with traditional batteries, compressed-air systems can store energy for longer periods of time and have less upkeep. Energy from a source such as sunlight is used to compress air, ...

Founded in 2020 and headquartered in Hasle bei Burgdorf (canton of Bern), Green-Y Energy develops and produces innovative compressed air energy storage systems ...
