As one of the largest battery technology research platforms available to industrial R& D projects in Switzerland, the overall aim of ESReC is to develop knowledge and technologies essential for ...

Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg, Switzerland, in what could become one of Europe's largest flow storage ...

This is not only a record-breaking flow battery (redox) energy storage system in terms of scale but also a symbol of the upcoming transformation of Europe's energy landscape.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in ...

The country is also quietly becoming a global leader in energy storage power stations. This article is your backstage pass to understanding how Switzerland is balancing its ...

Information on national and international energy research projects with Swiss partners can be found on various search platforms, depending on how projects are funded.

Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg, Switzerland, in what could ...

Swiss data centre density is among the highest in the world Some 120 data centres are based in Switzerland, with more than ten new projects being built.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it ...

Switzerland's latest battery energy storage system (BESS) entrant has hti the ground running, with two 2 MW projects with Schindler and Energie Wettingen either live or ...

The world's largest flow battery energy storage system is under construction in Switzerland. In the Swiss town of Laufenburg, located at the intersection of the borders of ...

As we approach Q2 2025's bid deadline, one thing's clear: Switzerland isn't just buying storage systems--they're procuring grid resilience. The winners won't be those with the cheapest kWh ...
