The Beyond the Grid Fund for Africa (BGFA) has signed two new agreements in Uganda to establish new mini-grids and scale up distribution of solar-powered refrigerators in the country.

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

There is great hope pinned on solar mini-grids to fulfil universal rural electrification targets and enable clean energy access, especially in low-income African countries such as ...

Station Energy has developed an innovative concept for a solar- powered cold room that would provide refrigeration and freezing for fresh products of any type in isolated areas.

Discover the untapped market for custom solar modules in Uganda. Learn how to design panels for off-grid homes and farms to build ...

Station Energy has developed an innovative concept for a solar- powered cold room that would provide refrigeration and freezing for fresh products ...

In the last seven years, the Uganda Off-Grid Energy Market Accelerator (UOMA) has worked closely with various stakeholders in Uganda's energy sector to foster increased access to off ...

Solar photovoltaic (PV) mini-grids are a nascent technology in Uganda; only a few are operational, such as the Kitobo solar power plant in Kalangala district. Most solar PV mini-grid business ...

This research demonstrates the potential of hybrid solar PV-biogas microgrids as a viable solution to address energy poverty and waste management challenges in off-grid rural communities in ...

The Beyond the Grid Fund for Africa (BGFA) has signed two new agreements in Uganda to establish new mini-grids and scale up distribution of solar-powered refrigerators in ...
