A complete solar-battery-generator power plant pre-built into a shipping container. We integrate the inverter/chargers, lithium batteries, DC charge controllers, switchgear, ...

The Intech Energy Container -- or ECON -- is a modular, pre-configured off-grid power solution. It combines solar PV, battery storage, inverters, and energy management in a rugged container.

Large-scale, grid-connected or standalone systems for high-demand applications. Ideal for utility-grade resilience hubs and remote ...

Victron Energy products have earned a strong following in Victoria, particularly for off-grid and remote installations. Their ecosystem includes inverter-chargers like MultiPlus and ...

An Off-Grid Solar Container delivered to the property before construction began. The container provided clean, consistent power throughout the entire build process--running saws, drills, ...

Large-scale, grid-connected or standalone systems for high-demand applications. Ideal for utility-grade resilience hubs and remote communities. Supports microgrid portfolios with multiple ...

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

An off-grid solar energy system with battery storage offers a range of benefits for remote businesses, particularly those who are in regional Victoria. We design and install larger-scale ...

Learn how to optimise your solar array for winter, size your battery correctly, and ensure your inverter and backup systems can handle seasonal peaks in heating and cooling ...

Victoria Off-solar container grid inverter Enterprise
