Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

The BESS project aims to demonstrate the commercial viability of battery energy storage in Vietnam and showcase the practical benefits of renewable energy, including its ...

The Ministry of Science and Technology has been tasked with accelerating 5G commercialization to enable nationwide deployment in 2025. Simultaneously, the government ...

The operator has reported more than 2.5 million active users and plans to add a further 10,000 base stations, aiming to provide 5G coverage to 100% of communes nationwide.

Vietnam's leading mobile operators--Viettel, VNPT, and MobiFone--are ramping up their 5G rollout, collectively deploying 11,000 base stations across the country.

To accelerate the nationwide deployment of 5G, the Ministry of Science and Technology (MOST) has directed telecom operators to ensure that by 2025, the number of 5G ...

As detailed above, there are significant challenges for Vietnam to make further 3.5 GHz band available for 5G services, especially in the quantum needed to address the country's mid-band ...

In Vietnam, some 5G tests have demonstrated download speeds of 1 Gbps--ten times faster than 4G in the same locations. Beyond speed, 5G offers ultra-low latency and the ...

Vietnam's leading mobile operators--Viettel, VNPT, and MobiFone--are ramping up their 5G rollout, collectively deploying 11,000 ...

To fast-track 5G deployment, Vietnam has introduced a subsidy covering 15% of telecom companies' equipment costs. The policy, designed to encourage rapid investment, ...

Vietnam expects to deploy more than 68,000 5G base stations this year alone, equivalent to 57.5% of current 4G stations and sufficient to meet the coverage goal.
