A UPS system provides battery backup power to keep your devices running during short outages and provides enough runtime to properly shut down electronics during extended outages.

These UPS units closely simulate standard utility power, ensuring consistent and reliable performance. Single-phase UPS systems are suitable for smaller setups, while three-phase ...

If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you. Its 1500VA/900W capacity should be ...

APC, a flagship brand of Schneider Electric, provides clean battery back-up power, surge protection, and IT physical infrastructure inside and outside the traditional IT environment to ...

Runtime varies based on power consumption of connected devices. At half load (750VA/450W), the UPS provides approximately 10 minutes of backup power, while at full load ...

TVA's Watts Bar Unit 1 near Spring City, Tenn., was the last nuclear power generator completed by a U.S. utility. It cost nearly \$7 billion in 1996. TVA's two other plants, the twin-reactor ...

Knoxville-based TVA -- the country's largest public utility, serving 8.7 million consumers in Tennessee and six surrounding states -- also expects to decide by late summer if it will ...

Provides a manufactured waveform output to supply cost-effective battery backup power for equipment that does not require sine wave output. This model is an ENERGY STAR<sup>®</sup>; certified ...

The power supply provides a U/I output characteristic with a power reserve of up to 50 percent and allows parallel operation to increase capacity and to enable redundancy.

The specification now sets maximum levels for power consumption when the computer is on but idle -- previously, Energy Star dealt only with the ability to enter "sleep" mode. There won't ...
