Can Denmark be a global leader in transport and storage of CO2?

Denmark can utilize and build on existing strong competences in shipping and offshore energy to become a global leader in the transport and storage of CO2 for storage and utilisation. The Danish shipping sector wants to be a key driver of this journey.

How can Danish shipping companies make a green transition?

This requires action, and the transition has started. For Danish shipping companies - whether they operate container ships, tankers, ferries, rigs, or offshore vessels - the green transition requires massive investments, new skills, technology, and energy infra-structure.

What does the Danish Energy Agency do?

The Danish Energy Agency is responsible for tendering procedures for the award of permits for exploration and storage of CO2 in the Danish subsoil. The Danish Energy Agency also regularly consults citizens, industry, local government and other authorities as new potential CO2 storage sites undergo environmental assessment.

What does the Danish shipping sector do?

As such, the Danish shipping sector is actively engaged in offshore wind, the development of transport and storage solutions of captured carbon, as well as utilisation of CO2 in PtX over time.

For Danish shipping companies - whether they operate container ships, tankers, ferries, rigs, or offshore vessels - the green transition requires massive investments, new skills, technology, ...

In conclusion, transportation of container energy storage is a complex process that requires careful consideration of multiple factors. As a container energy storage supplier, we ...

The project focuses on the safety guidelines, regulations, and knowledge gaps surrounding Battery Energy Storage Systems (BESS) across various countries. The report provides a ...

"We need to make storage a Danish strength, and it requires that the energy industry, industrial sector, consultants, suppliers, and researchers work purposefully together ...

The Danish subsoil is a shared resource, and, as a co-owner of exploration and CO2 storage licenses, the state
