A globally interconnected solar-wind power system can meet future electricity demand while lowering costs, enhancing resilience, and supporting a stable, sustainable ...

As we approach 2026, the Marshall Islands could become the first Pacific nation to achieve 24/7 renewable power. The pieces are all there--it's about strategic implementation rather than ...

Energy storage systems (ESS) paired with solar/wind offer a lifeline - reducing fuel dependence by up to 70% while stabilizing grids in this vulnerable archipelago.

The Marshall Islands' unique energy landscape (think: scattered islands + rising sea levels + diesel dependency) makes energy storage meters the unsung heroes of daily life.

The microgrid consists of an island-wide, 2.4-MW solar photovoltaic (PV) system and a 2 MW/3-MWh lithium-ion battery storage system expected to reduce diesel consumption by 55 percent, ...

Sustainability economic study of the islands of the Azores archipelago using photovoltaic panels, wind energy and storage Currently, the nine islands of the Autonomous Region of the Azores ...

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf]

Modern horizontal-axis wind turbines (HAWTs) specifically designed for tropical conditions have changed the game. Take the Typhoon-Resistant TR-250 model tested in Guam last year--it ...

Marshall Islands - Owner's Engineer for Floating Solar, BESS and Power Station refurbishment. ITP is engaged as Owner's Engineer for a hybrid energy project in Majuro, ...

Technological advancements are dramatically improving solar storage container performance while reducing
