Is 5G coming to Bangladesh?

The two 5G launches come a year and a half after the Bangladesh Telecommunication Regulatory Commission (BTRC) issued unified licences to Robi, Grameenphone, Banglalink and Teletalk that enable all of them to upgrade their current networks to 5G and 6G under the same licence. In fact, 5G has been in the pipeline in Bangladesh for years.

What is 5G mobile connectivity in Bangladesh?

Recently, fifth-generation (5G) mobile connectivity has been launched in Bangladesh on a trial-run basis. 5G is a super-speed mobile network that is much faster than the existing fourth-generation (4G) technology.

What is the difference between 4G and 5G in Bangladesh?

More specifically, 4G has an average speed of 10 Mbps and 5G has an average speed of 10 Gbps. According to the Bangladesh Telecommunication Regulatory Commission (BTRC), some cities in Bangladesh promised to be covered by the 5G network by 2022.

What are the challenges in implementing a 5G network in Bangladesh?

The major challenges in implementing a 5G network in Bangladesh include the cost of spectrum, equipment, cost, deployment coverage, lack of supported devices, high consumer VAT (value-added tax), short length propagation of mmWave, security, and privacy. This paper will also present the current Internet speed in Bangladesh.
