How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

Can storage systems help reduce energy consumption in Estonia?

Estonia's climate minister, Yoko Alender, emphasized the role of storage systems in this transition, stating, "Estonia has a clear goal - by 2030, the amount of electricity we consume must come from renewable sources.

Will Estonia become the largest Battery Park in continental Europe?

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, marking a crucial step toward synchronizing the Baltic power grids with the rest of Europe by 2025.

What is the Baltic storage platform?

The project, spearheaded by the Baltic Storage Platform--a joint venture between Estonian energy company Evecon, French solar producer Corsica Sole, and sustainable finance management company Mirova--aims to bolster energy security and support Estonia's transition to renewable energy. Project Details

Baltic Storage Platform is a joint venture between Evecon, Corsica Sole and Mirova, developing two battery storage parks in Estonia with a combined capacity of 400 MWh.

Evecon and Corsica Sole are joining forces in the Baltic Storage Platform joint venture to build and operate high-capacity battery storage power plants connected to the ...

Last week, the company Baltic Storage Platform started the construction of a 330 kV substation in Kiisa for the largest battery park complex in mainland Europe.

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia.

Evecon and Corsica Sole are joining forces in the Baltic Storage Platform joint venture to build and operate high-capacity battery ...
