Our mission is to generate electric power with high quality, availability and efficiency, in accordance with the highest international standards.

Natural gas is increasingly being used to fulfill the country's domestic energy needs, especially with regard to electricity generation. Jordan was estimated to have only modest natural gas reserves (about 6 billion cubic meters in 2002), but new estimates suggest a much higher total. In 2003 the country produced and consumed an estimated 390 million cubic meters of natural gas. The prim...
