Eco Marine Power was founded in 2010 to develop wind, solar and electric power-based fuel-saving and emission-reduction solutions for ...

Battery-electric ships, wind-assisted propulsion, and solar-powered vessels are no longer prototypes or novelties. They are operational, investable, and increasingly essential to ...

The "Black Magic" concept tanker is a 125m long solar hybrid vessel that would cut greenhouse gas emissions by 75 to 100% - harnessing energy ...

In a bold step towards decarbonizing one of the world's most polluting sectors, the world's first hybrid solar-powered cargo vessel is set to set sail--offering a blueprint for the ...

Imagine a revolutionary vision of the maritime industry: autonomous, solar-powered container ships that blend cutting-edge ...

Imagine a revolutionary vision of the maritime industry: autonomous, solar-powered container ships that blend cutting-edge engineering with environmental stewardship. ...

The "Black Magic" concept tanker is a 125m long solar hybrid vessel that would cut greenhouse gas emissions by 75 to 100% - harnessing energy from the Sun, wind and waves to charge a ...

The adoption of wind-assisted and solar-powered vessels is expected to accelerate in the coming years, driven by technological advancements, regulatory pressures, ...

Solar is emerging as a particularly attractive option for integration into shipboard power systems due to its abundance, reliability ...

Amid growing global pressure to reduce maritime carbon emissions, this "sun-powered" bulk carrier undoubtedly injects a beam of clean and steadfast sunlight into ...

Wind-resistant solar-powered containers for ships
