Do I need a performance packaging for a lithium battery?

However, if the package contains no more than 2.5 kg of lithium metal cells or batteries, UN performance packaging is not required when the package displays both the Lithium Battery Mark and the Class 9 Lithium Battery label. See 173.185(c)(5)(i) for details. o Damaged, defective, or recalled lithium batteries are forbidden from air transport.

What are the labeling requirements for lithium ion batteries?

Lithium-ion batteries are widely used in consumer electronics, electric vehicles, and energy storage systems. Their labeling requirements are designed to ensure safe handling and transportation. You must include specific details such as the UN number, hazard class, and proper shipping name on the lithium battery label.

Do lithium batteries need CAO labels?

Lithium metal batteries frequently require CAO labels for air shipments, while lithium-ion batteries may not. You must understand these distinctions to ensure compliance with labeling requirements and avoid shipment delays. Tip: Always verify the latest regulations for lithium battery labeling to stay compliant and maintain smooth operations.

What are EPA's new battery labeling guidelines?

By developing new voluntary battery labeling guidelines, EPA seeks to increase consumer awareness of the presence of batteries in products and to empower consumers to properly dispose of them, depending on their local collection programs.
